## INLEIDING

Deze AZPAS geneesmiddelenklapper geeft, in alfabetische volgorde, een overzicht van de geneesmiddelen die ingaande 01 januari 2022 worden vergoed door Assuria.

Voor vergoeding van deze geneesmiddelen gelden een aantal aandachtspunten:

- De voorschrijver dient zich te houden aan de AZPAS Geneesmiddelenklapper. Hierdoor wordt voorkomen dat klanten voor verrassingen komen te staan bij de apotheek.
- De voorschrijver dient in een beperkte dosering voor te schrijven en voor zover medisch noodzakelijk. Met betrekking tot de afleverhoeveelheid geldt bij middelen met een chronische indicatie een afgifte voor de duur van maximaal 2 maanden.
- Assuria vergoedt uitsluitend generieke middelen. Merkmiddelen worden in principe niet vergoed. De uitzonderingen op deze regel zijn opgenomen in het ADDENDUM bij deze geneesmiddelenklapper. Hierin zijn merkmiddelen opgenomen die gepatenteerd zijn of waarvoor vooralsnog geen generiek medicament in Suriname beschikbaar is, dan wel tegen een hogere prijs dan het merkmiddel. De voorschrijver dient te allen tijde het generiek geneesmiddel voor te schrijven.
- De verzekerden die aanspraak maken op medicamenten gelabeld onder de naam "GOLD" in de klapper kunt u gemakkelijk onderscheiden door de benaming "GOLD" welke op het verzekeringspasje van de betreffende verzekerde staat vermeld.
- De categorie geneesmiddelen aangegeven met de letter 'M' betreft de zogenoemde Machtigingsmiddelen. Dit zijn middelen waar alle verzekerden, ongeacht de dekking, in principe aanspraak op maken. De apotheker vraagt Assuria toestemming voor het verstrekken hiervan.
- Geneesmiddelen die moeten worden bereid zijn niet opgenomen, maar komen eventueel wel voor vergoeding in aanmerking.
- Standaard medische verbruiksartikelen worden vergoed volgens de AZPAS Geneesmiddelenklapper.

Assuria heeft bij de samenstelling van deze geneesmiddelenklapper de nodige zorgvuldigheid in acht genomen en aanvaardt geen enkele aansprakelijkheid voor eventuele onjuistheden in de verstrekte adviezen, resp. voorgeschreven middelen. Ons doel met deze geneesmiddelenklapper is om een bijdrage te leveren aan het rationeel gebruik van geneesmiddelen en zo het voorschrijven tussen de eerste en tweede lijn beter op elkaar te laten afstemmen.

| GENERIEK MIDDEL                       | TOEDIENINGSVORM    | STERKTE         | DEKKING     | M        |
|---------------------------------------|--------------------|-----------------|-------------|----------|
| ACARBOSE                              | TABLET             | 50 MG           |             |          |
